## Before First Use

Before using your new Ceramic cooktop:

- Read all instructions in your user manual, particularly the 'Safety Instructions' section.
- Remove any protective film or stickers that may still be on your ceramic cooktop.
- You should perform a 'burn off':  
With a half filled saucepan of cold water, heat on one cooking zone at a time, for 5 minutes, at the maximum setting. This will help to eliminate any new smells that exists and evaporate any humidity that has formed on the heating elements during transit.

## Operating Instructions

To start cooking:

- Place a suitable pan on the cooking zone that you wish to use. Make sure the bottom of the pan and the surface of the cooking zone are clean and dry.
- Turn the knob control clockwise to set your desired cooking level from 1–9. You can modify the heat setting at any time during cooking.

To finish cooking:

- Turn the cooking zone off by turning the knob counter-clockwise to the "OFF" position.
- After a zone is switched off, the residual heat indicator of the corresponding zone will be lit.
- The residual heat also can be used as an energy saving function if you want to heat further pans, use the hotplate that is still hot.
